

MY IB STORY

Deciding to join IB was one of the smartest decisions I ever made. I went into it expecting challenging courses and some improvement in certain classroom and life skills, but I got so much more than that out of it. I found a community that I grew to love. I was immediately greeted by teachers that loved what they did. Right from the get-go, I knew that they would always be there to help me succeed if I ever needed assistance, and this continued through senior year. I was also joined by a group of kids who had the same goal as me: finish the Programme strong. As someone who values a strong community, this was just what I needed to thrive over the course of my two years. Thanks to my teachers, my coordinator, and my classmates, I had an unforgettable experience in the Programme that I will forever be grateful I was able to have.
