

# MY IB STORY

These past two years in the Diploma Program have been what I can only describe as the Loch Ness Monster Roller Coaster I rode at Disney World a couple years ago. I went onto that roller coaster knowing I was going to come out alive, yet still being more scared than ever. The DP program was very similar to this roller coaster, I went in knowing I was going to come out okay, maybe even better, but still being so scared to take on this new adventure. Throughout my experience in IB, I underwent a series of

emotions and ups and downs. Although the program did provide its own large portion of stress onto my life, I definitely learned a lot through my experience within it. This program taught me that it is okay to be the only different one in the room, because you can still thrive regardless. It also revealed to me the importance of healthy competition haha!
