

MY IB STORY

IB can only be described as the most challenging yet rewarding years of my life so far. When I think back, I remember sitting at my desk for hours doing homework and studying whenever and wherever I could find the time. But I also remember spending a day writing EEs with my best friends, eating lunch in our TOK class, going on field trips, and being in classrooms where everyone was friends and there was constant laughter. Before IB, school was unexciting, but suddenly I was in a new world with teachers who supported and believed in me and classmates who were motivated and supported each other. The environment and community in IB are unlike anything else. I was pushed outside my comfort zone and saw myself grow in confidence while strengthening my academic skills, which allowed me to achieve my goals for the future. I am so grateful for the experience and everybody who was a part of it!
